

# Summer Sales at Vintage Gardens

## Roses

Ours is the largest selection of roses in North America; here sitting quietly in your back yard! And you needn't yank out your back seats to fit in few; we grow and sell most of our roses in six-inch deep pots, on their own roots. You can carry them out in a shoebox and plant in a jiffy; they grow fast, and last a lifetime. And what rare treats; bits of history like **BLUSH NOISETTE**, and fragrant classics like **ROYAL SUNSET**.

*Rose Bands – Buy Six, Get One Free!*

(New imports and Heritage Rose Foundation fundraiser varieties excluded)

*Rose Gallons – Buy Four, Get One Free!*

*Rose Five Gallons – Buy Four, Get One Free!*

## Hydrangeas

Where else in California can you find such a complete collection of historic Hydrangeas and the information you need to get to know this beautiful genus? We think we have something very special; from dwarf treasures like the miniature **HORNLI** to the magnificent giants, **Goliath** and **Sir Joseph Banks**. The delicate woodland Hydrangeas of Japan, **AKISHINO TEMARI** and **BENI-GAKU**, the elegant climbing Hydrangea relative **SCHIZOPHRAGMA 'MOONLIGHT'**, and the exquisitely variegated **HYDRANGEA 'QUADRICOLOR'**, each will grace a special spot in your shady garden corner.

*Hydrangea bands – Buy Six, Get One Free!*

*Hydrangea gallons – Buy Four, Get One Free!*

## Agapanthus, Cannas, Kniphofia and More

Vintage Perennials are always a rare lot, and though we grow fewer than we once did, every one we propagate is unusual, and all of them are great garden plants.

**AGAPANTHUS** may be common in California but the best cultivars are hard to find. Our favorites include the old **DOUBLE AGAPANTHUS**, the dwarf, deep cobalt **BRESSINGHAM BLUE**, Phillip Robinson's own heavy blooming deciduous, **MORNING SKIES**, and **WINTER DWARF**, a diminutive evergreen with excellent reliable bloom, superior to **PETER PAN**.

**KNIPHOFIAS**, the Poker plants so familiar in the waysides of Northern California, come in a range of subtle as well as brilliant hues. Luther Burbank's **TOWER OF GOLD** is an elegant, long-blooming plant with 6 foot spikes of clear yellow.
